JMH CONNECT

Simple Business Requirements Document (BRD)

Jaffna Mission House — Daily Activities & Spiritual Community System

Item	Details
Project name	JMH Connect
Purpose	To organize JMH daily activities and help members stay informed and connected.
Users	Members, Leaders, Pastor
Expected users	Around 20–25 people
Platform	Website that works on mobile phones and computers

1. What is JMH Connect?

JMH Connect is a simple website for the people staying at Jaffna Mission House. It helps everyone see daily devotion details, housework duties, upcoming events, birthdays, and important announcements in one place.

2. Why do we need this system?

- To make daily activities easier to organize.
- To let everyone know their assigned duties and schedules.
- To remember birthdays, Sunday services, and special events.
- To share important announcements with all members.
- To help members take part in fellowship and spiritual activities.

3. Who will use the system?

User	What they can do
Member	View schedules and announcements, see assigned duties, and mark their attendance if enabled.
Leader	Manage devotion schedules, assign duties, create events, and publish announcements.
Brother	Oversee the system, manage member records, and approve important activities or announcements.

4. Main features

Feature	Simple explanation

Home page	Shows today's devotion, duties, upcoming events, and announcements.
Morning devotion	Shows the devotion time, Bible passage, leader, and attendance.
Housework duties	Shows who is responsible for cleaning and other shared tasks.
Events and birthdays	Shows Sunday services, birthdays, and special programs.
Announcements	Leaders can share important news and reminders.
Member management	Authorized leaders or the pastor can add or deactivate members.

5. What should be included in the first version?

The first version should focus only on the features JMH members need most:

- Login for members, leaders, and pastor.
- A simple home page.
- Devotion schedule and attendance.
- Housework duty assignments.
- Events and birthday reminders.
- Announcements.
- Basic management options for leaders and pastor.

Features such as private prayer requests, personal journals, photo galleries, and push notifications can be added later if JMH needs them.

6. Important requirements

- The website must be easy to use on a phone.
- Each user must log in to access the system.
- Members should only see information they are allowed to access.
- Only authorized leaders and the pastor can change schedules or manage members.
- Member information must be kept safe.
- The system should be simple to maintain and affordable to host.

7. Suggested technology

Part	Technology
Website / Frontend	Angular
Backend / API	ASP.NET Core Web API
Database	SQL Server
Hosting	A suitable cloud service, preferably within a verified free tier for the pilot

8. How will we know the system is ready?

- Members can log in successfully.
- Members can see their schedules, duties, events, and announcements.
- Leaders and pastor can manage the features allowed for their roles.
- Attendance and duty updates are saved correctly.
- The website works on mobile phones and computers.
- JMH leaders and pastor test it and agree it is ready to use.

9. Future improvements

- Prayer request sharing with privacy settings.
- Bible-reading plan.
- Private personal devotion journal.
- Event photos and memories.
- Tamil language option.

10. Approval

This is a simple first draft. JMH members, leaders, and the pastor should review it and suggest any changes before development begins.
